CHITRAKSH SURI

+91 6230020604 | Noida, India

chitrakshsuri2005@gmail.com | linkedin.com/in/chitrakshsuri | github.com/ChitrakshSuri | Portfolio

SKILLS

Languages	Python, C/C++
GenAI & LLMs	LangChain, LangGraph, RAG, LangSmith, Multi-Agent, Voice Agents, AI Avatars
Vector Databases	FAISS, Milvus, Qdrant, Pinecone
Backend & Infra	FastAPI, PostgreSQL, Supabase, Docker
Automation & Tools	n8n, Relevance AI, Git, Linux

WORK EXPERIENCE

Prismberry Technologies Feb 2026 – Present
Software Engineer (Gen AI / Backend) Noida, India

- Built **AgentIQ** — enterprise AI agent platform with a **9-stage text-to-SQL pipeline** (hybrid BM25 + vector + FK-graph retrieval, two-stage LLM planning, sqlglot validation) and **voice agent** (Sarvam STT + OpenAI Realtime) for natural language querying over production databases.
- Engineered **multi-provider LLM orchestration** via LiteLLM with **LangGraph state machine**, hybrid RAG + Cohere reranking, SSE streaming, Celery ingestion, and PII guardrails via Microsoft Presidio.

The Ladder July 2025 – Jan 2026
AI Automation Engineer Gurugram, India (Hybrid)

- Built **end-to-end automation and RAG pipelines** using **n8n** (40+ node workflows), Apollo, Clay, and Apify for **lead generation, CRM enrichment (HubSpot)**, and AI-driven personalization for enterprise clients.
- Developed **AI-powered voice and creative agent systems** — inbound/outbound voice agents for sales/support and automated ad-creative pipelines (Midjourney, DALL·E, GPT) to reduce manual effort and operational costs.

Dreamable Inc. San Francisco Bay Area, US (Remote)
AI Agent Intern June 2025 – August 2025

- Built **AI agents** with **n8n, LangChain, OpenAI** for WhatsApp, LinkedIn, and lead workflows.
- Designed **RAG-based document Q&A systems** using LangChain, embeddings, and vector databases.
- Engineered **voice AI agents** with **Whisper, ElevenLabs, and Tavus** using multi-agent flows.

PROJECTS

GPT Anatomy — Transformer from Scratch with 3D Visualizer October 2026
PyTorch, FastAPI, SSE streaming, Three.js, Docker, pytest, Render Live Link

- Built a **10.8M-parameter GPT-style language model from scratch in PyTorch** (6 layers, 6 heads), trained in 50 min on free Colab T4; a **FastAPI** backend uses forward hooks and **streams tokens over SSE**.
- Designed a **3D visualizer** (Three.js) of real attention, feed-forward and softmax values with play/pause stepping through each next-token prediction; **Dockerized**, thread tuning gave **8× faster** generation on throttled CPU.

MeetMind — AI Meeting Assistant with Agentic Jira Integration June 2026
LangGraph, FastAPI, React, PostgreSQL, GPT-4o, MeetingBaaS, Docker Live Link

- Built an **AI meeting assistant**: a **7-node LangGraph agent** joins Meet/Zoom, transcribes, drafts Jira tickets with **LLM self-correction**, pauses for **human review**; **Postgres-checkpointed**, deployed on Render/Vercel.
- Engineered an **async FastAPI backend** with **webhook idempotency**, **exponential-backoff retries** and conditional routing, plus a **6-call parallel Jira metadata pipeline** (REST v3 + Agile) for the React review UI.

RESEARCH

Advances in Emotion-Aware AI Agents for Mental & Emotional Health IEEE SCEECS, 2026
Built a multimodal AI agent combining text, speech, and facial emotion recognition for mental health support.

EDUCATION

ABES Engineering College, Ghaziabad 2022 – 2026
B.Tech in Computer Science
